CORY FOX

Technical Implementation Consultant

Sheffield, UK | 07442 342723 | coryowenfox@gmail.com | coryfox.co.uk

PROFILE

Technical implementation consultant specialising in AI, automation and user adoption. I combine hands-on software development and UX leadership with client implementation and a teaching background. I translate business requirements into practical workflows, connect systems, validate data and create clear guidance for the people using the result.

CORE EXPERTISE

AI and implementation: Workflow automation, requirements gathering, platform configuration and process improvement.

Technical delivery: Python, REST APIs, Claude API, Microsoft Graph, Power Query, OData and data validation.

People and adoption: Stakeholder communication, UX research, usability testing, training resources and technical documentation.

SELECTED EXPERIENCE

Implementation Consultant

Aptem May 2026 - Present

- Translate team requirements into practical AI-enabled workflows, combining implementation knowledge with software development and UX experience.
- Support clients implementing Aptem learning and employability platforms, clarifying requirements and shaping workflows and reporting solutions.
- Build repeatable Excel Power Query and OData reports; investigate data issues, validate field mappings, and check outputs against requirements.
- Create technical documentation and step-by-step handover guides, explaining reporting logic and technical processes in plain English.

Software Developer / UX/UI Lead

FourJaw Manufacturing Analytics July 2021 - May 2024

- Progressed from Software Developer to UX/UI Lead, improving onboarding and operational workflows across web and tablet SaaS products.
- Led discovery and usability work, collaborating with product and engineering to turn user needs into practical platform improvements.
- Developed features using Python, Flask, MongoDB, React and TypeScript; helped modernise the frontend and introduce a consistent design system.

FURTHER EXPERIENCE

Design & Technology Teacher

Thrybergh Academy June 2025 - May 2026

- Designed and delivered structured learning across technical and practical topics, adapting explanations for different needs and confidence levels.
- Created step-by-step resources and video walkthroughs; introduced digital tools and guided learners through their use.
- Supported assessment, evidence collection and coursework against qualification requirements.

UX/UI Designer & Developer

SoloProtect UK January 2020 - January 2021

- Designed monitoring, alert and location-aware workflows for a safety-focused platform, supporting clear operational decisions.
- Translated UX decisions into production-ready interfaces in a C# .NET and Xamarin environment.

UX/UI Designer & Developer

DataboWl January 2018 - January 2020

- Improved onboarding, setup journeys and campaign workflows in a lead management SaaS platform. Returned on a short-term basis from January to July 2021 to support increased workload.
- Built Angular interfaces for complex validation and data-led tasks, contributing to workflow design and delivery in a Postgres-backed environment.

eLearning Developer

Relish Learning 2017

- Led client discovery and translated complex subject matter into structured digital learning, using Articulate Storyline, SCORM and custom code.
- Delivered learning solutions for organisations including Sainsbury’s, EY and SDL.
